WELCOME TO THE COURSE IN ADULT DEVELOPMENT!

CONTENTS
This course is an in depth examination of adult development. Emphasis is placed on mastering fundamental developmental principles. The interface between biological, cognitive, and social development will also be traced and explored through adulthood. Students will examine traditional and contemporary developmental theories/research and will evaluate these theories/research on empirical, practical, and heuristic grounds. Adult development will be discussed in a holistic fashion.

ASSESSMENT

Grading Criteria

Final exam 100%

*The individual interview, the group work, participation in seminars, and interview report are pass/fail assignments and are regarded as compulsory course requirements.

Exam closed book and comprehensive, essay format on content knowledge based learning objectives. Students will earn a letter grade for the final exam. Specific grading criteria for the exam are as follows: Students’ explanations of key points of developmental knowledge will be weighted equally. Therefore, if there were 5 questions on the exam, each question would have the same importance for the final exam grade.

An A grade for an explanation to a particular question would:

- Be accurate (in other words it would be “factually correct”).
- Have excellent coverage of content or knowledge relevant to the question. Including a complete explanation of psychological terms used in the answer.
- Have an innovative use of important and relevant (to the question) concepts that we have dealt with in class and the readings in the explanation.
- Make use of examples to illustrate key points.
- Be logical and coherent in organization.

A “B” grade for a given explanation (i.e., response to a question) would fulfill the criteria listed above but would be very good rather than excellent in terms of accuracy, content coverage, innovation, use of examples to illustrate key points, logical organization and coherence in answers.

A “C” grade for a given explanation (i.e., response to a question) would fulfill the criteria listed above but would have a major shortcoming (i.e., a repeated problem) in one area: accuracy, content coverage, innovation, use of examples to illustrate key points, poor logical organization and lack of coherence.

A “C” grade for a given explanation can also be earned in a case in which the criteria listed above were fulfilled but would have significant shortcomings across more than one grading criterion: accuracy, content coverage, innovation, use of examples to illustrate key points, poor logical organization and lack of coherence.

A “D” grade for a given explanation (i.e., response to a question) would have major shortcomings in two areas: accuracy, content coverage, innovation, use of examples to illustrate key points, poor logical organization and lack of coherence in answers.
A “E” grade for a given explanation (i.e., response to a question) would have major shortcomings in three areas: accuracy, content coverage, innovation, use of examples to illustrate key points, poor logical organization and lack of coherence in answers.

A “Fx” grade for a given explanation (i.e., response to a question) would have major shortcomings in four areas: accuracy, content coverage, innovation, use of examples to illustrate key points, poor logical organization and lack of coherence in answers.

A “F” grade for a given explanation (i.e., response to a question) would not fulfill any of the criteria for an A grade.

Letter grades are calculated using a seven-point rating scale of A to F. Students’ final grades for the course will be the result of the final exam and a passing grade on the case study assignment. The grade for the final exam is recorded as a letter grade.

A-Excellent  D-Satisfactory  F-Fail
B Very Good  E-Sufficient
C-Good  Fx-Insufficient
